

Program:

Information Resilience – An Enterprise Issue Not IT

Keeping sensitive information secure from theft and vulnerability in today's digital world is not as easy as some technology firms may lead you to believe especially with the widespread adoption of cloud computing. Organizations are increasingly exposed to active hackers, phishing scams and other threats that arise from poor information/ cyber security. Even if you take every precaution with your online accounts and identifying information, there are many ways that information can land in another individual or company's data management systems, where it can then be made vulnerable to date theft or data leakage.

With the current expansion of data linkage risk, the challenge is to find the balance between preserving the privacy of person-level data whilst making these data accessible for use to their full potential. Essentially finding the right balance of Confidentiality, Integrity and Availability. Unfortunately, far too many organizations see privacy as a standalone issue and treat it separate from security. To address this issue properly, a holistic organizational wide Information Resilience plan that covers all of people, process and technology is in order.

In This talk we will discuss:

- ♦ Global trends on Cyber Security
- ♦ Information lifecycle and areas of vulnerabilities
- ♦ Planning for information resilience
- ♦ Specific controls that address cyber weaknesses

Speaker: Katie Warlick, BSI Group

Katie Warlick is a Business Development Manager at BSI Group, focused on information resilience, strengthening organizations through information security strategy and development. Since 2014, Katie has been focused on developing and implementing strate-

President's Message

Dear Members, Colleagues, and Friends-

Wow, it's already May and we are nearing the end of the program year. We have two events in May and I hope you can join us.

First is our ISM SCM Symposium on Friday, May 11. The Symposium is a very cost effective way to earn 7.5 CEH for attending this local event. The theme of the Symposium is "Maximize Your Team's Performance with Traction and Accountability." Please sign up and share with any other team members or friends that may benefit from this material.

Second, is our ISM joint dinner meeting with ASQ on THURSDAY, May 17, at the Millennium. The speaker will be Adam Kowalski from Business Solutions on information security affecting supply chain and quality.

The annual Installation Dinner is scheduled for Wednesday, June 13, at Rizotto Ristorante, where we will install our board members (new and old), President-Elect and President. As we install our board members, we ask you to consider helping out a couple hours a month by volunteering for committees or tasks.

Our Annual Buy/Sell Golf Outing & Clambake is on Tuesday, June 19. This event sets the stage for some great "relationship building" among buyers and sellers and supports our scholarship and education fund. By popular vote, we are returning the event to the Pine Acres Country Club in Bradford, PA where we have a good course and great food catered by Old Library. If you cannot make it, ISM would appreciate your support by way of a gift basket or donation for the Chinese Auction/Basket Raffle or a corporate sponsorship.

Let's end this program year on a positive note as the board gets ready to work towards our 2018-2019 Program year!

Deb Hasley, CPSM/C.P.M.
2017-2018 President

Caribbean fun at our April 11 meeting at Curly's. L-R are: Kathleen Campbell, CPSM, NRG Energy; Jim Austin, CPSM, UB; Les Switzer, EcoTech Office Environments; and James Campbell, GM Powertrain.

**About the Speaker and BSI Group continued
from page 1**

gies to make organizations more resilient by protecting vital information, and building ongoing management systems to maintain the integrity of the information. Prior to BSI, Katie worked as a process improvement auditor with Bart and Associates, focusing on corporate and IT process improvement.

BSI is the business standards company that helps organizations all over the world make excellence a habit. For more than a century they have been challenging mediocrity and complacency to help embed excellence into the way people and products

work. That means showing businesses how to improve performance, reduce risk and achieve sustainable growth. As a global leader in helping organizations improve, their clients range from high profile brands to small, local companies in 193 countries worldwide.

Read Buylines and Win a Prize!

- 1) Write down the correct answer on the back of your business card.
- 2) Place it in the Basket at the May Dinner Meeting
- 3) Win a Prize*

*If your correct answer is drawn. One entry per person.

April's question and answer:

As a condition of doing business with Company A, Supplier B is required to maintain at a separate warehouse in a different part of the world, a minimum of six months' inventory at all times. This is an example of a(n) (A) contingency plan
And the winner of a Pizza Plant gift card was Barb Madigan of Goodyear!

AND THIS MONTH'S QUESTION IS....

In the hierarchy of the planning process, which of the following should be completed FIRST?

- (A) Business strategy
- (B) Financial plan
- (C) Market strategy
- (D) Operations plan

As someone who never set out to be in the Supply Chain field, I'm always curious how others got here and how they operate on a daily basis. The other week I was fortunate enough to grab beer with Julie, a Sr Buyer for Thermo Fisher Scientific.

Since I'm not really sure what you do, can you describe what your role is?

Thermo Fisher, my division, makes cell culture media which supports the growth of cells outside the body. We make final product in both a liquid and powder form. The procurement team is somewhat divided into chemicals and packaging/parts, and I support mostly packaging/parts as well as OEMs. We have several internal divisions that probably 80% of my spend is with and I work extremely closely with those 2 or 3 divisions.

So what is the purchasing or supply chain group, however they call it, how is it organized?

It's really just Procurement & Planning, however we do not report the same, directly. We all sit together and we all have to have a close relationship as their schedule relies on what we have.

So how does that work then if you're negotiating with internal suppliers?

If it's internal, you typically get it at cost plus 20%, and that's one of the biggest struggles. I don't always have that opportunity to go out and get a better price because I'm limited to my internal suppliers.

So, if 80% of your spend is with internal customers and you're highly judged on quality, what are you measured on and how do you measure yourself?

We all have an on-time deliver metric, PPV, and quality metrics just to name a few.

Is PPV still measured if it's internal?

It's measured but you don't see it in the numbers; someone's keeping track of it in the background, but I don't necessarily get credit for it.

Do you work on standard cost then?

Standard cost is dictated by corporate; sometimes they roll it, sometimes they don't. This year we rolled it, but they only look at things that are \$5K and up, and I don't even know if it's that low. Once it's set, it is very difficult or impossible to get it reset.

Does that PPV measurement spit out of your ERP system or do you have to manually calculate it?

It will spit out, comparing PO cost vs the standard cost; we get a report at the end of each month and we have to report out anything that's over \$1k in adverse, or good, you have to provide a reason. Half the time we're saying it's because standard cost isn't set properly. A perfect example, one of our suppliers, they were putting in a price increase April 1 and it was going to have a \$250K impact over all the prod-

Q & A

Julie Cross, CPSM

Senior Buyer at Thermo Fisher Scientific
Secretary - ISM-Buffalo

By Matt Swanekamp, CPSM

ucts we buy from them, and we got the list like 2 days before standard costs were going to roll and we tried to implement, they said no, it was too late, so now we're gonna get all that negative PPV. There's so much handled at the corporate level, sometimes the sites hands are just tied.

So besides on-time delivery and PPV, anything else?

Cost savings, like if you run any cost savings projects, that's a big one and risk mitigation, so it's a little bit tougher with packaging or parts because they are designed supplier specific. For the chemical side, take chemical A, and I only have one source and that source goes up in flames, I'm screwed. So you have to go through a risk mitigation process to add a source B, C, D..Most of the time it's very difficult because of the nature of the product. You might be sole-sourced, there might be only 1 company in the world that makes that particular product so you're stuck. We have a scoring process which covers things like contracts or MSA's, what's their business continuity plan, what's their supply chain look like, will the hold safety stock, etc. One of our goals this year is to identify two high-risk items (per buyer) and put a plan in place to lower the risk.

Since you have your CPSM and you're involved in ISM, you already stand out above the average person in the field. So you have some drive, in the next 5 years, 10 years, what are you...

What do I want to be when I grow up?

No, cause it's obviously a rock star, but besides that...

I don't have the faintest clue. Despite the fire-fighting and the stress, I absolutely love what I do, I love the people that I work with, I love the industry that I'm in. Sad to say, in a way, I love the stress. I wasn't always doing this, when I started at Thermo I was doing indirect buying and then I moved on to some chemicals and then back to indirect, then I was managing OEM's, so it's probably with the last 5 years that I got into the packaging aspect and within the last 2 years have gotten more involved in it. I have a really good relationship with the packaging engineers. I was there for so long and was like, "I don't have the faintest clue what we make, I just buy the shit and it shows up, they put it into a product and they ship it out". It wasn't until one of the packaging engineers was like "why don't you come back with me and I'll show you everything and how it works", and he took the time to actually show me why we do some of the things that we do. I remember saying that to my boss, "I don't understand why it took me 10 years to figure out why we do something", that should be part of your on-boarding, you should learn that within the first 2-3 years, because if you don't understand what you're doing you can't challenge it. I think that was the first time I said to my boss, I might have some sort of interest in packaging engineering. I have no background in it, I have no degree in it or anything, but because I work so closely with them, I thought that would be a good segue into learning more about it and being involved in the new projects.

I was just like any other person, I just fell into this field, I literally started out, when I first started working in the real world, as a receptionist at a small job shop, and within a year moved to another dept. and within 6 months another, so I worked my way up until I ended up in a supply chain role, and then I came here and it was a whole different world. Thermo Fisher was overwhelming to me at first. I didn't know anything about large scale manufacturing or distribution. I am a believer in starting from the ground up to truly understand the flow of an organization. For me it's a constant learning environment. I really enjoy the procurement role, I don't know if it will morph into something different with the way our industry is going as far as more of a planning / scheduling procurement role based on the profile I'm doing right now, we'll see, it's a really hard question that I ask myself every day.

BLACK-BOX SOURCING

The practice of treating a purchased part or subassembly as a black box whereby the supplier is given the functional and interface requirements and is expected to design the rest. Characteristics of black-box sourcing include: early involvement of suppliers, clear communications of the buyer's design requirements, and extensive design-related responsibility assumed by the supplier.

VERTICAL MARKET COMMUNITY

A group of individual professionals and companies in the same vertical market that trade information, advice, goods and services online.

2018 ISM-Buffalo Board Candidates

Nominations & Elections Chair Martha Switzer, CPSM has announced the following slate of candidates. Nominated for two-year director terms: James M. Austin, MBA, CPSM; Julie Cross, CPSM; and Jonathan Desing, C.P.M. Nominated as President-Elect was Martha Switzer, CPSM. Deb Hasley, CPSM was nominated to serve again as President for 2018-19.

Rounding out the board and serving the second year of their two-year term are Katie Dzielski, Craig Hooftallen and Heather Leising.

Since the slate is full with three director candidates, a president and a president-elect as mandated by our bylaws, there is no contest and one ballot will be cast for the candidates at the May 17 meeting. Come to show your support for our future leaders.

Director Candidates:

James M. Austin, MBA, CPSM

James Austin, MBA, CPSM is a Supply Chain and Customer Care Professional with over 30 years' experience in Property Management, Consulting, and Operations. Currently, he is the Stores Operations Supervisor at the University at Buffalo, where he is also a graduate in the Business Administration and Organizational Behavior Studies programs. Additionally, he obtained his Bachelor of Science from Canisius College.

In his role as the Stores Operations Supervisor, he has managed centralized receiving, integrated a multi-echelon Inventory system, and overseen WMS and 3PL for facilities operations.

As a member of ISM-Buffalo since 2013, he has been active and helpful to the membership, always offering new ideas and a fresh perspective to the group. Having served on the board for the past two years, he has negotiated and booked exciting new venues for our programs. He is a regular contributor to the newsletter with relevant SCM articles and terms. He received his Certified Professional of Supply Management certification through the organization in 2015.

Julie Cross, CPSM

Julie has been working in Procurement since 1999 and became a member of the association in 2007. After relocating from Pittsburgh, PA in 2006, Julie began working as an indirect buyer, focusing on MRO's and services for Invitrogen. Following a merger in 2008, Invitrogen became part of Life Technologies and her role expanded into OEM and direct materials, including packaging components, chemicals and irradiation services. Life Technologies was acquired by Thermo Fisher in 2014 and Julie's main responsibilities are now focused on supporting single-use technology in biopharmaceutical production, packaging components and OEMS.

Julie earned her CPSM in October of 2013 and has served as elected secretary of ISM-Buffalo since 2015.

Jonathan Desing, C.P.M.

Jonathan (Jon) Desing, C.P.M. has been an active member of ISM-Buffalo since 2008. Having earned his original Certified Purchasing Manager designation in 2009, he is now lifetime certified C.P.M. Jon is a past recipient of the Carl F. Green Memorial Award that recognizes our associ-

ation's "unsung heroes" for volunteerism. He's assisted with check-in at our monthly meetings as well as awarding the coveted 50/50.

He has a Bachelors degree in Business from Buffalo State. His resume includes various purchasing positions with Niagara Transformer, The Red Wing Company, ArcelorMittal, Olin Chlor Alkali, American Steamship and currently Panasonic.

President-Elect Candidate:

Martha Switzer, CPSM

As an active member of ISM-Buffalo since 2007, Martha has dutifully served on the Board of Directors since 2015, holding the positions of Director of Operations, President Elect, President, and Affiliate Support Council Director.

She earned her degree in Business, Management, and Economics from Empire State College with a 3.79 GPA. She obtained her CPSM through ISM several years ago and is continuing to expand her knowledge in Purchasing, Inventory/Production Control, Planning, Operations, and Logistics at every opportunity.

Martha has been a passionate contributor representing many local employers, as a key driver of improvement initiatives within the processes of manufacturing. She began her career in 2001 with Gaymar Industries. In 2014, Martha transitioned from medical device to food and beverage manufacturing when she accepted a position at Island Oasis Frozen Cocktail Company as Inventory Coordinator. and was then promoted to Materials Manager. She oversaw six direct reports, over three shifts, and was responsible for the management of all aspects of materials flow. She maintained control and accuracy of all inventory transactions, procurement, planning, scheduling, cost, warehouse, receiving, and shipping.

Having a wide breadth of knowledge in procurement and inventory control, inclusive of many various industries, Martha also held the role of Inventory Control Supervisor at NutraBlend Foods, where she oversaw as many as 10 direct reports, over three shifts. She was responsible for accuracy of several million dollars in inventory flow from raw materials, to finished goods, to offsite storage, in absence of a warehouse management system.

Martha is currently Inventory and Schedule Coordinator for Sumitomo Rubber USA, LLC, formerly Goodyear Dunlop Tires, where she facilitates the planning, material control, and production of motorcycle tires within the business center.

Described by former coworkers as a "skilled problem solver and decision maker who knows how to execute and is not afraid to roll up her sleeves". "Martha is well recog-

Candidates continued on next page

nized for her attention to detail, tactical execution skills, and her ability to perform both independently, as well as a motivating member of cross-functional teams". She is eager to continue to maintain a position on the Board of Directors alongside other local supply management professionals and is looking forward to serving the membership and the local community by helping to organize new and engaging educational opportunities, to make each year better than the last.

President Candidate:

Debra A. Hasley, MBA, CPSM, C.P.M.

Deb Hasley will begin her second consecutive year as ISM-Buffalo President for 2018-19. Deb has been an active member of ISM (NAPM) since joining in 1997. She served on the Program/Professional Development Committee for nine years before she was elected for her first term on the board, holding the position of Membership Director from 2008-2010. She returned to the board for the 2012-13 year as Affiliate Support Council Director and returned yet again as President-Elect in 2016-17 and President in 2017-18.

The association honored Deb for her service with the Carl F. Green Memorial Award as the association's "unsung hero" in 2011 and the William J. Gamble Memorial Award, the association's highest honor, in 2015,

Having attended Niagara University, Deb received her B.S. in Business in 1992 and her MBA in 1995. Earning her original C.P.M. in 2000, she is now Lifetime Certified. In December 2015, she achieved CPSM certification.

She's been in the purchasing field for over 20 years, holding procurement positions at Carborundum, Angus Buffers and Biochemicals, Sherwood, Avox, and for the past eight years, Multisorb Technologies.

Professional Placement Committee Report/Job Openings

If you are interested in looking for a new position, please forward your resume to Heather Leising, Chairman of the Professional Placement Committee. If a job comes up and you look like a good match, Heather will contact you so that you can send your resume to the company. As always, this is a confidential service for members.

Employers can also send their job postings/descriptions to Heather as well.

Heather Leising: hleising@noco.com.

POSITION AVAILABLE:

DIRECTOR OF PROCUREMENT at a local manufacturing firm. Contact Heather at the above email for detailed job description and contact information.
