

ISM-Buffalo presents an educational webinar via Zoom

Wednesday, February 23, 2022
10:00am-11:00am EST

Title: Supply Chain Risk & Resilience

Supply Chain Risk is everywhere. Adverse events can and will happen at any time. With today's global supply networks, a disaster thousands of miles away challenges your operations. And when events hit your supply chain, disruption and damage – financial, operational, reputational – are not far behind.

2021 has turned Supply Chains upside down. Supply network disruptions, commodity shortages, and insolvencies are still rising. Supply chain disruptions are costly. According to McKinsey Global Institute, on average, supply chain disruptions cause 4.2 % EBITDA loss per year.

By managing risk, you protect your margins. Finally, supply chain risk management has now moved onto the agenda of the C-suite, who have tasked their procurement and supply chain teams with finding a solution. While you cannot prevent adverse events, you can learn to react quickly and proactively to reduce consequences and avoid some risks altogether. An effective risk management strategy in the digital age connects humans and advanced supply chain risk management technology.

Learn how to empower your organization fast to manage your supply chain risks more effectively and grow your maturity & resilience.

- Risks impacting businesses
- Risk governance (Organization & Structures)
- Supplier & stakeholder integration
- Tools, methods, policies & procedures
- Digital supply chain risk management

Presenter: Jan-Henner Theissen

Jan is the Founder of targetP! – agile Procurement enabled, a boutique Procurement advisory firm located in Berlin, Germany & Atlanta (US). He is an experienced Procurement executive with a 25-year Procurement history in the Automotive, Agricultural Machinery, and Oil & Gas industry. Throughout his international career, Jan gained vast international experience and led several Procurement transformations and Procurement Excellence teams around the globe.

Besides building effective Procurement organizations, Jan is passionate about developing powerful Supply Chain Risk Management & Digital Procurement programs. Jan built several digital ecosystems with his teams, and he led more than 20 solution implementations. His digitalization projects earned him various leading Supply Chain awards such as the German "BME Excellence in eSolutions" or the "BVL Logistikpreis." Jan's projects have been featured on Forbes.com, and he's a frequent contributor to publications.
